

## **Company Policy Statement**

EX Engineering is a specialised supplier and engineering consultancy working with electrical equipment and industries involved with explosive atmospheres. Product and service quality are paramount to the commercial success of each project undertaken by the company.

To ensure reliability and longevity of the products, EX Engineering has developed a fully documented and implemented Quality System which satisfies the requirements of: AS/NZS ISO 9001 -2015 Series ISO IEC 80079-34 and IEC 60079-19.

The Quality System is concerned with achieving and maintaining the required quality during quotation/contract review, engineering, procurement, repair, assembly and dispatch.

We are committed to continually improving the effectiveness of our Quality Management System hence improving our work practices leading to improved customer relations.

Measurable targets for improvement have been established and are continually reviewed by management.

EX Engineering recognises its responsibility to mitigating climate change. This is achieved by identifying environmental impacts, developing and implementing strategies to mitigate energy consumption and maximise recycling opportunities.

The company operates to the philosophy that continuous improvement involves all members of the company and always recognising the needs and expectations of our customers.
